this fabulous anthology is sure to be a core text for history of medicine and social
 science classes in colleges across the country in order to demonstrate how medical
 research has influenced western cultural perspectives the editors have collected
 original works from 61 different authors around nine major themes among them
 anatomy and destiny psyche and soma and the construction of pain suffering and
 death the authors range from aristotle the bible and louis pasteur to masters and
 johnson ernest hemingway and simone de beauvoir the primary sources selected to
 illustrate the themes are well chosen and contrast with each other nicely however the
 brief background material for the selections center around the authors and offer little
 or no discussion about the selections relevance to the topics at hand this book would
 be best read in a class or group where the texts meaning in relation to each other
 can be discussed but the book can stand alone if the reader is prepared to do some
 critical thinking

the routledge handbook of medicine and poetry draws on an international selection

of authors to ask what the cultures of poetry and medicine may gain from reciprocal critical engagement the volume celebrates interdisciplinary inquiry critique and creative expansion with an emphasis upon amplifying provocative and marginalized voices this carefully curated collection offers both historical context and future thinking from clinicians poets artists humanities scholars social scientists and bio scientists who collectively inquire into the nature of relationships between medicine and poetry importantly these can be both productive and unproductive how for example do poet doctors reconcile the outwardly antithetical approaches of bio scientific medicine and poetry in their daily work where typically the former draws on technical language and associated thinking and the latter on metaphors how does non narrative lyrical poetry engage with narrative based medicine how do poets writing about medicine identify as patients central to the volume is the critical investigation of the consequences of varieties of medical pedagogy for clinical practice presenting a vision of how poetic thinking might form a medical ontology this thought provoking book affords an essential resource for scholars and practitioners from across medicine health and social care medical education the medical and health humanities and literary studies

in socializing medicine pao chen tang yuqian yan and ling zhang explore the intersections of medicine health and east asian media interweaving archival research audiovisual analyses and theoretical insights from the emerging field of health humanities the book reveals the multifaceted ways in which the mass media from photography and film to television and live streaming has been deployed as a tool for controlling medicine and health privileging those with power and authority from the early twentieth century to the present adopting anti colonial and anti capitalist perspectives the contributors in this volume challenge the dominant mediations of health against the backdrop of imperialism cold war geopolitical tensions and neoliberal capitalism collectively they advocate for alternative understandings of medical culture through media productions that envision accessible and equitable healthcare practices this groundbreaking anthology diverges from eurocentric models to span the celluloid past and digital present and investigate how east asia offers not only illuminating examples of media shaping the socially based construction of health and medicine but also some fascinating alternatives to state centered efforts to bind the body to the nation aaron gerow yale university expanding the boundaries of health humanities and media studies simultaneously socializing medicine presents an enthralling picture of the ideological significance of medical media in east asia its transnational and intermedial approach wisely recognizes that media like viruses rarely remain stable entities or respect national borders an essential addition to the growing literature on the relationship between media medicine and power scott curtis northwestern university

medical humanities may be broadly conceptualized as a discipline wherein medicine and its specialties intersect with those of the humanities and social sciences as such it is a hybrid area of study where the impact of disease and healing science on culture is assessed and expressed in the particular language of the disciplines concerned with the human experience however as much as at first sight this definition appears to be clear it does not reflect how the interaction of medicine with the humanities has evolved to become a separate field of study in this publication we have explored through the analysis of a group of selected multidisciplinary essays the dynamics of this process the essays predominantly address the interaction of literature philosophy art art history ethics and education with medicine and its specialties from the classical period to the present particular attention has been given to the medieval early modern and enlightenment periods to avoid a rigid compartmentalization of the book based on individual fields of study we opted for a fluid division into multidisciplinary sections reflective of the complex interactions of the included works with medicine

patients and doctors alike are keenly aware that the medical world is in the midst of great change we live in an era of continuous healthcare reforms many of which focus on high volume efficiency and cost effectiveness this compelling thoughtful book is the response of a practicing physician who explains how population based reforms are diminishing the relationship between doctor and patients to the detriment of both as an antidote to stubbornly held traditions dr abraham m nussbaum suggests ways that doctors and patients can learn what it means to be ill and to seek medical assistance drawing on personal stories validated studies and neglected history the author develops a series of metaphors to explore a doctor s role in different healthcare reform scenarios scientist technician author gardener teacher servant and witness each role shapes what physicians see when they encounter a patient dr nussbaum cautions that true healthcare reform can happen only when those who practice medicine can see and be seen by their patients as fellow creatures his memoir makes a hopeful appeal for change and his insights reveal the direction that change must take jacket flap

texts of the past were often not monolingual but were produced by and for people with bi or multilingual repertoires the communicative practices witnessed in them

therefore reflect ongoing and earlier language contact situations however textbooks and earlier research tend to display a monolingual bias this collected volume on multilingual practices in historical materials including code switching highlights the importance of a multilingual approach the authors explore multilingualism in hitherto neglected genres periods and areas introduce new methods of locating and analysing multiple languages in various sources and review terminology theories and tools the studies also revisit some of the issues already introduced in previous research such as latin interacting with european vernaculars and the complex relationship between code switching and lexical borrowing collectively the contributors show that multilingual practices share many of the same features regardless of time and place and that one way or the other all historical texts are multilingual this book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history

From Square Meters to Square Feet: A Comprehensive Guide to Unit Conversion

Understanding unit conversions is crucial in various fields, from construction and real estate to interior design and engineering. This article focuses specifically on converting 250 square meters (m^2) to square feet (sq ft), a common conversion needed when dealing with property sizes, floor areas, or land measurements. We will delve into the conversion process, explain the underlying mathematics, and provide practical examples to solidify your understanding. We'll also address common questions surrounding this conversion.

Understanding the Units: Square Meters and Square Feet

Before diving into the conversion, let's understand the units involved. A square meter (m^2) represents the area of a square with sides measuring one meter each. Similarly, a square foot (sq ft) represents the area of a square with sides measuring one foot each. The key difference lies in the base unit of measurement: the meter (metric system) and the foot (imperial system). Converting between these systems requires a conversion factor that accounts for the difference in length between a meter and a foot.

The Conversion Factor: Meters to Feet

The fundamental conversion factor between meters and feet is approximately 3.28084 feet per meter. This means that one meter is equal to 3.28084 feet. However, since we're dealing with area, which is a two-dimensional measurement, we need to square this conversion factor. Therefore, one square meter (m^2) equals $(3.28084 \text{ ft/m})^2 \approx 10.7639 \text{ sq ft}$. This is the key number for our conversion.

Calculating 250 m^2 to sq ft

To convert 250 square meters to square feet, we simply multiply the area in square meters by the conversion factor: $250 \text{ m}^2 \times 10.7639 \text{ sq ft/m}^2 \approx 2690.97 \text{ sq ft}$. Therefore, 250 square meters is approximately equal to 2691 square feet. It's common practice to round the result to a whole number or a convenient decimal place, depending on the level of precision required.

Practical Examples

Let's consider some real-world examples to illustrate this conversion: **Real Estate:** You're looking at a property advertised as 250 m². Using our conversion, you can quickly determine that this is approximately 2691 sq ft, giving you a clearer picture of the property's size. **Construction:** You're planning a new building with a floor area of 250 m². For material estimations or architectural drawings that might use imperial units, you'll need to convert this to square feet, giving you a figure of around 2691 sq ft. **Interior Design:** You are designing a room with an area of 250 m². To purchase flooring or calculate paint quantities based on square footage, you would convert this to approximately 2691 sq ft.

Beyond the Basic Calculation: Considering Precision

While the approximation of 10.76 sq ft/m² is widely used, more precise calculations might be needed for critical applications. Using a more accurate conversion factor, such as 10.7639, ensures greater accuracy. For highly precise measurements, consider using specialized conversion tools or software.

Conclusion

Converting 250 square meters to square feet is a straightforward process, primarily involving multiplication by the appropriate conversion factor. Understanding this conversion is essential for anyone working with measurements across different unit systems. Remember that while approximate conversions are often sufficient, high-precision applications might demand more accurate calculations.

FAQs

1. What is the exact conversion factor for m² to sq ft? The exact conversion factor is (3.28084 ft/m)², which is approximately 10.76391 square feet per square meter. 2. Can I use online converters for this? Yes, numerous online converters are readily available to perform this conversion quickly and accurately. 3. Why are there different values for the conversion factor? Slight variations arise due to rounding off the initial meters-to-feet conversion factor. The more decimal places used, the more accurate the result. 4. Is it always necessary to use the exact conversion factor? No, for most everyday purposes, using an approximate value like 10.76 sq ft/m² is sufficient. High-

precision work demands more accurate figures. 5. How can I convert square feet back to square meters? To convert square feet back to square meters, divide the area in square feet by the conversion factor (approximately 10.76 sq ft/m²). Alternatively, use the inverse, approximately 0.0929 m²/sq ft.
