this beautiful term through a glass darkly is found in the old king james bible and it is referring to looking into a poor quality mirror getting some distortion in your reflection or as the darby translation puts it through a dim window obscurely the glass darkly effect of seeing the truth of the bible only in part is caused by the lapse of time the history of the church non spirit led people a denominational accommodating theology to justify a particular stance and our fallibility as humans in many cases these factors have caused us at times to be unfaithful to his word some may read this book and say i am a literalist or purist but before you judge me please consider god s word when it says in ephesians 4 5 one lord one faith one baptism which could be a catch cry for unity in the body of christ the church but sadly many differ in what even this statement means a rhetorical question who can say they are 100 correct in their perspective of understanding scripture here is the challenge could we make a statement of faith based on ephesians 4 5 that will bring unity and if most of us are honest we will say i am right and if you adopt what i say then everything will be fine of course this

position is unworkable when viewing an attempt of unity a synergistic understanding of the bible requires a three point perspective one the bible is god s word two the bible is settled whether i understand it or even believe it three i am blessed if i believe it and follow its direction for my life while reading this book please consider that god has placed in creation and in his word a synergy when adhered to will bring a unity

all things new is not just another book on bible prophecy are we the terminal generation are we the generation of mankind that will see the fulfillment of its prophecies this book answers those questions the book of revelation needs to be engaged more now than in any era of human history however many recent books on the subject of revelation take a much too scholarly approach to a book that was written to be understood by the common man all things new is a verse by verse commentary guide for the christian or non christian reader who may simply want to know what the book of revelation is all about and what its significance is for us today included are definitions of the basic terms related to the church and christianity that a non believer might not understand but are necessary for a clear comprehensive understanding of revelation this book is not just about scary beasts incomprehensible images and mind boggling catastrophes and judgments its also a book of vindication for the people of god a demonstration of god s eternal justice and most importantly a book of hope for a world that seems to have lost its way there are storm clouds on the horizon and a cold night of despair will follow but the night is never so cold as just before the dawn may everyone who reads this book find joy peace and tranquil hope for the future in the person of jesus christ a new day is coming and a new world will dawn in which god will indeed make all things new to read a kirkus review for this book copy and paste this address into your browser [kirkusreviews.com](http://kirkusreviews.com)

this book came about from a daily devotional i started in 2011 in an effort to give my children a way to read scripture as they began life on their own over the last ten years has grown by the grace of the lord to reach readers worldwide i am truly amazed however this journey started well before that as i was growing up i had flashes of awareness about the presence of god but i never really acted on them until i joined the united states navy i was stationed aboard the uss nimitz during the iranian hostage crisis we were chosen to launch the rescue attempt apparently the american government sold cruise missiles to iran when it was under the leadership of the shah and we had no defenses against those missiles had the iranians used the missiles it would have caused much damage and potentially many deaths i knew that if i died i would be in hell but god had another idea that was to recue this dead man in his sins with this in mind i was looking around and saw people that were rich poor and everywhere in between coming from good homes and bad ones i remember that night being a very clear night with the stars looking like a planetarium creation was yelling at me that evening job 12 7 19 says but ask the beasts and they will teach you the birds of the heavens and they tell you or the bushes of the earth and they will teach you and the fish of the sea will declare to you who among all these things does not know that the hand of the lord has done this in his hand is the life of every living thing and the breath of all mankind romans 1 20 for ever since the world was created people have seen the earth and sky through everything god made they can clearly see his invisible qualities his eternal power and devine nature so they have no excuse for not knowing god well the creation was letting me know things i apparently didn t

know the lord through his creation called out to me to start to awaken me from the dead i remember saying god if you are real then i need to know and if this is what life is all about gathering things living a life and then dying then it this meaningless and it sucks this was prayed in april 1980 then on january 16 1982 as i was making my rounds as the manager of a parking garage in worcester massachusetts i ran right into the presence of god by now i was well aware of my sin i remember saying to god i am what they said i am whatever that is and you can go ahead and make me into whatever you want after that moment i looked for the christians that worked for me and told them what happened they told me you met the lord now you need to go to a bible believing church and grow okay i responded and left then i returned and asked them what is a bible believing church and how do i find one that led me to holden chapel in holden massachusetts where the lord started his work in me to serve him as i served others this of course is a lifelong journey that is full of joy sorrow growth mercy and grace just to name a few through it all i have the lord jesus in control of everything ephesians chapter 2 verse 10 says for we are god s handiwork created in christ jesus to good works which god prepared in advance for us to do i truly hope that the lord will use this book of devotional messages to bring you to him and grow your faith as you fulfill the works that he prepared for you in advance

## Understanding Protons, Neutrons, and Electrons: A Comprehensive Q&A

Introduction: The fundamental building blocks of matter are atoms, and within atoms reside three crucial subatomic particles: protons, neutrons, and electrons. Understanding the number and arrangement of these particles is key to comprehending the properties of elements, chemical reactions, and the behavior of matter in general. This article explores these particles through a question-and-answer format, aiming to provide a clear and comprehensive understanding of their roles and significance.

Section 1: What are Protons, Neutrons, and Electrons? Q: What are protons, neutrons, and electrons, and where are they located within an atom? A: Protons, neutrons, and electrons are subatomic particles that make up atoms. Protons carry a positive electrical charge (+1), neutrons are electrically neutral (0), and electrons carry a negative electrical charge (-1). Protons and neutrons reside in the atom's nucleus, a dense central core, while electrons orbit the nucleus in regions called electron shells or orbitals. The nucleus occupies a tiny fraction of the atom's overall volume, but it contains almost all of its mass.

Section 2: How do these particles determine an element's identity? Q: How does the number of protons, neutrons, and electrons influence an element's properties? A: The number of protons in an atom's nucleus uniquely defines the element. This number is called the atomic number (Z). For example, all hydrogen atoms have one proton (Z=1), all helium atoms have two protons (Z=2), and so on. The number of neutrons can vary for a given element, leading to isotopes. Isotopes are atoms of the same element with the same number of protons but a different number of neutrons. For example, carbon-12 has six protons and six neutrons, while carbon-14 has six protons and eight neutrons. The number of electrons typically equals the number of protons in a neutral atom, ensuring an overall neutral charge. However, atoms can gain or lose electrons, forming ions with a net positive (cation) or negative (anion) charge. The number of electrons significantly impacts an atom's chemical behavior, determining its reactivity and bonding properties.

Section 3: What are isotopes and their significance? Q: What are isotopes, and why are they important? A: Isotopes are atoms of the same element that have the same number of protons but a different number of neutrons. This difference in neutron number affects the atom's mass but

not its chemical properties significantly. Some isotopes are stable, while others are radioactive, meaning their nuclei decay over time, emitting radiation. Radioactive isotopes have various applications, including medical imaging (e.g., using iodine-131 in thyroid scans), carbon dating (using carbon-14 to determine the age of organic materials), and cancer therapy (e.g., cobalt-60).

Section 4: How are ions formed, and what are their properties? Q: How are ions formed, and how do they differ from neutral atoms? A: Ions are formed when atoms gain or lose electrons. When an atom loses electrons, it becomes a positively charged ion (cation), while gaining electrons results in a negatively charged ion (anion). This charge imbalance significantly alters the atom's chemical behavior. For instance, sodium (Na) readily loses one electron to form a  $\text{Na}^+$  ion, while chlorine (Cl) readily gains one electron to form a  $\text{Cl}^-$  ion. The electrostatic attraction between cations and anions forms ionic bonds, crucial for the structure and function of many compounds, like table salt ( $\text{NaCl}$ ).

Section 5: Real-world applications of understanding protons, neutrons, and electrons. Q: How is our understanding of protons, neutrons, and electrons applied in real-world scenarios? A: The principles governing protons, neutrons, and electrons have widespread real-world applications. Nuclear power plants utilize nuclear fission, a process involving the splitting of atomic nuclei (protons and neutrons) to generate energy. Nuclear medicine employs radioactive isotopes for diagnosis and treatment. Semiconductors, the foundation of modern electronics, rely on manipulating the number and behavior of electrons in materials. Understanding chemical bonding, dependent on electron interactions, is crucial for developing new materials, pharmaceuticals, and understanding biological processes.

Takeaway: Understanding the number and arrangement of protons, neutrons, and electrons within an atom is fundamental to grasping the properties of matter and its interactions. The atomic number (number of protons) defines an element, while the number of neutrons determines its isotopic form. The number of electrons influences an atom's chemical behavior and its ability to form ions and participate in chemical reactions. This knowledge has far-reaching applications in various scientific and technological fields.

FAQs: 1. Q: What is nuclear fusion, and how is it different from fission? A: Nuclear fusion is the process of combining two lighter atomic nuclei to form a heavier nucleus, releasing immense energy. This is the process powering the sun and stars. Unlike fission, which splits nuclei, fusion combines them. 2. Q: How can we determine the number of neutrons in an atom? A: The number of neutrons can be calculated by subtracting the atomic number (number of protons) from the mass number (total number of protons and neutrons). 3. Q: What is the significance of electron shells in determining an atom's reactivity? A: Electrons occupy specific energy levels or shells. Atoms with incomplete outermost shells are more reactive as they strive to gain or lose electrons to achieve a stable electron configuration (usually a full outer shell). 4. Q: How does the strong nuclear force hold the nucleus together? A: The strong nuclear force is a fundamental force that overcomes the

electrostatic repulsion between positively charged protons within the nucleus, holding it together. 5. Q: What are quarks, and how do they relate to protons and neutrons? A: Protons and neutrons are not fundamental particles; they are composed of smaller particles called quarks. Each proton and neutron consists of three quarks bound together by the strong force.
