leo strauss is known to many people as a thinker of the right who inspired hawkish views on national security and perhaps advocated war without limits moving beyond gossip and innuendo about strauss s followers and the bush administration this book provides the first comprehensive analysis of strauss s writings on political violence considering also what he taught in the classroom on this subject in stark contrast to popular perception strauss emerges as a man of peace favorably disposed to international law and skeptical of imperialism a critic of radical ideologies who warns of the dangers to free thought and civil society when intellectuals ally themselves with movements that advocate violence robert howse provides new readings of strauss s confrontation with fascist nazi jurist carl schmitt his debate with alexandre kojève about philosophy and tyranny and his works on machiavelli and thucydides and examines strauss s lectures on kant s perpetual peace and grotius s rights of war and peace

since its publication in 1952 leo strauss s persecution and the art of writing has stirred considerable controversy particularly among historians concerned with early modern philosophy on the one hand several scholars share his view that it would be inadequate to generally take at face value the explicit message of texts which were composed in an era in which severe sanctions were imposed on those who entertained deviating views reading between the lines therefore seems to

be the appropriate hermeneutical approach on the other hand the risks of such an interpretative maxim are more than obvious as it might come up to an unlimited license to ascribe heterodox doctrines to early modern philosophers whose manifest teachings were in harmony with the orthodox positions of their time the contributions to this volume both address these methodological issues and discuss paradigmatic cases of authors who might indeed be candidates for a straussian reading between the lines hobbes spinoza and bayle

similarities between esoteric and mystical currents in different religious traditions have long interested scholars this book takes a new look at the relationship between such currents it advances a discussion that started with the search for religious essences archetypes and universals from william james to eranos the universal categories that resulted from that search were later criticized as essentialist constructions and questioned by deconstructionists an alternative explanation

was advanced by diffusionists that there were transfers between different traditions this book presents empirical case studies of such constructions and of transfers between judaism christianity and islam in the premodern period and judaism christianity and western esotericism in the modern period it shows that there were indeed transfers that can be clearly documented and that there were also indeed constructions often very imaginative it also shows that there were many cases that were neither transfers nor constructions but a mixture of the two

why do well educated antiwar activists call the president of the united states the new hitler and argue that the u s government orchestrated the september 11 attacks why does al gore believe that cars pose a mortal threat to the security of every nation why does the princeton professor known as the father of the animal rights movement object to humans

eating animals but not to humans having sex with them and why does peta defend that position in other words why do smart people fall for stupid ideas the answer daniel j flynn reveals in intellectual morons is ideology flynn the author of why the left hates america shows how people can be so blinded to reality by the causes they serve that they espouse bizarre sometimes ridiculous and often dangerous positions the most influential social movements have spawned ideologues who do not care whether an idea is good or bad true or false but only whether it can serve their cause it is startling how many americans and particularly how many media academic and political elites fall for bad ideas the trouble is their lies become institutionalized as truth and we all suffer as a result in intellectual morons flynn reveals how rabid anti americans simply parrot the delusional claims of a few gurus how the environmental movement spawned by a scientist whose doomsday predictions are almost always wrong has bred fanaticism stupidity and dishonesty how the hero of the animal rights crowd is a crank who promotes infanticide and euthanasia how a scientific fraud and pervert launched the sexual revolution how abortion rights activists ignore or cover up the fact that their matron saint advocated eugenics and concentration camps how our universities have become hothouses of leftist ideology how historians and journalists have airbrushed history to turn a racial separatist into a civil rights icon filled with jaw dropping lapses in common sense from even our most celebrated opinion leaders intellectual morons is a welcome reality check for the glaring excesses of today s political and cultural debates this is a sophisticated pile driver of a book guiding us through the wiles of great luminaries of the netherworld and such liveliness in the writing and such erudition i was quite fascinated by intellectual morons william f buckley jr intellectual morons is exceptionally aptly named the thought of all that brainpower going down the intellectual drain is sad but daniel flynn s description of it is hilariously on point this is must reading g gordon liddy intellectual morons is a delight a wonderful intellectual history of the past hundred years flynn ably describes the purveyors of the bad ideas that have undermined our free society burton w folsom jr professor of history hillsdale college

a famous bit of folk wisdom says you've got to stand for something or you'll fall for anything some of the crackpot notions now fashionable in academic circles as here documented by Daniel Flynn suggest that saying is an understatement if you want to know how crazy and scary intellectual morons can get you have to read this book m Stanton Evans author of the theme is freedom contributing editor to Human Events

leo strauss s readings of historical figures in the philosophical tradition have been justly well explored however his relation to contemporary thinkers has not enjoyed the same coverage in leo strauss and contemporary thought an international group of scholars examines the possible conversations between strauss and figures such as walter benjamin jacques derrida michel foucault charles taylor and hans blumenberg the contributors examine topics including religious liberty the political function of comedy law and the relation between the ancients and the moderns and bring strauss into many new and original discussions that will be of use to those interested in the thought of strauss the history of philosophy and political theory and contemporary continental thought

an obituary so soon surely the reports of neoconservatism s death are greatly exaggerated c bradley thompson has written with yaron brook the most comprehensive and original analysis of neoconservatism yet published and in the process has dealt it a mortal blow neoconservatism an obituary for an idea reveals publicly for the first time what the neocons call their philosophy of governance their plan for governing america this book explicates the deepest philosophic principles of neoconservatism traces the intellectual relationship between the political philosopher leo strauss and contemporary neoconservative political actors and provides a trenchant critique of neoconservatism from the perspective of america s founding principles the theme of this timely book neoconservatism as a species of anti

americanism will shake up the intellectual salons of both the left and right what makes this book so compelling is that thompson actually lived for many years in the straussian neoconservative intellectual world neoconservatism therefore fits into the breaking ranks tradition of scholarly criticism and breaks the mold when it comes to informed incisive nonpartisan critique of neoconservative thought and action

a compelling alternative account of the history of knowledge from the Renaissance to the Enlightenment until now the history of knowledge has largely been about formal and documented accumulation concentrating on systems collections academies and institutions the central narrative has been one of advancement refinement and expansion Martin Mulsow tells a different story knowledge can be lost manuscripts are burned oral learning dies with its bearers new ideas are suppressed by censors knowledge lost is a history of efforts from the Renaissance to the Enlightenment to counter such loss it describes how critics of ruling political and religious regimes developed tactics to preserve their views how they buried their ideas in footnotes and allusions how they circulated their tracts and treatises in handwritten copies and how they commissioned younger scholars to spread their writings after death filled with exciting stories knowledge lost follows

in the study of the national socialist state and its aftermath two unusual aspects continue to occupy historians and social science commentators first a factor important enough to enter into the very definition of totalitarianism is the thoroughgoing mobilization coercive if needed of the population of writers teachers professors journalists and other intellectual workers securing cooperation or at the least passive concurrence in the mass inculcation of the population in the destructive fascist ideology second is the central place of dissident members of these populations in the exile since webs of communications with others the majority of whom had remained in germany had constituted their own memberships in the populations at issue the question of their roles in the post war era depended importantly on the ways and means by which they restored or refused to restore communications with those who had remained

this book argues that natural law when construed as an epistemological and trans cultural lingua franca adjudged capable of legitimating the rational intelligibility and universal applicability of specific christian moral principles within contemporary secular discourse has failed through a detailed analysis of the contributions of three prominent natural law theorists who are located within a shared philosophical theological tradition namely john finnis jean porter and john milbank the text illuminates the extent to which this failure is as much intramural as it is extramural morgan explores how new horizons open up for natural law if the theological unsaid s are allowed to surface and the disremembering power of the secular mythos is overcome the final chapter s of the book addresses one such horizon that the theoretical fulcrum of the natural law lies not in its perceptual self evidence or in its immanent secularity but rather in its subtle provision of an immanent eschatology

this book reassesses the academic field of political theory and brings into sharp relief its problems and opportunities here

for the first time diverse theorists coordinate their arguments through a common focus this focus is the writing of john g gunnell gunnell attacks a set of myths said to plague almost every recent theory about politics the myth of the given the myth of science myths of theory the myth of tradition and the myth of the political he argues that these all alienate political theory from substantive inquiry and actual practice contributors include richard e flathman russell l hanson george kateb paul f kress j donald moon john s nelson j g a pocock herbert g reid ira l strauber nathan tarcov and sheldon s wolfe they respond on behalf of projects in the new history of political theory epic theory phenomenology traditional theory and political deconstruction these discussions also address the theories of hans georg gadamer jürgen habermas karl marx leo strauss alain touraine and ludwig wittgenstein at the conclusion of the volume gunnell reconsiders his arguments in light of the respondent s remarks his challenges thus provide a series of confrontations both exciting and provocative among major theorists the result is a lively debate about what political theory is how it relates to political history and practice and how it involves epistemology the authors probe a broad range of questions about practices of politics and traditions of discourse and they identify priorities for the future of the field

less than two years before his murder cicero created a catalogue of his philosophical writings that included dialogues he had written years before numerous recently completed works and even one he had not yet begun to write all arranged in the order he intended them to be read beginning with the introductory hortensius rather than in accordance with order of composition following the order of the de divinatione catalogue william h f altman considers each of cicero s late works as part of a coherent philosophical project determined throughout by its author s platonism locating the parallel between plato s allegory of the cave and cicero s dream of scipio at the center of cicero s life and thought as both philosopher and orator altman argues that cicero is not only plato s rival it was quintilian who called him platonis aemulus but also a

peerless guide to what it means to be a platonist especially since plato s legacy was as hotly debated in his own time as it still is in ours distinctive of cicero s late dialogues is the invention of a character named cicero an amiable if incompetent adherent of the new academy whose primary concern is only with what is truth like veri simile following augustine s lead altman shows the deliberate inadequacy of this pose and that cicero himself the writer of dialogues who used cicero as one of many philosophical personae must always be sought elsewhere in direct dialogue with the dialogues of plato the teacher he revered and whose platonism he revived

the portrait of john locke as a secular advocate of enlightenment rationality has been deconstructed by the recent religious turn in locke scholarship this book takes an important next step moving beyond the religious turn and establishing a theological turn nathan guy argues that john locke ought to be viewed as a christian political philosopher whose political theory was firmly rooted in the moderating latitudinarian theology of the seventeenth century nestled between the secular political philosopher and the christian public theologian stands locke the christian political philosopher whose arguments not only self consciously depend upon christian assumptions but also offer a decidedly christian theory of government finding locke s god identifies three theological pillars crucial to locke s political theory 1 a biblical depiction

of god 2 the law of nature rooted in a doctrine of creation and 3 acceptance of divine revelation in scripture as a result locke s political philosophy brings forth theologically rich aims while seeking to counter or disarm threats such as atheism hyper calvinism and religious enthusiasm bringing these items together nathan guy demonstrates how each pillar supports locke s latitudinarian political philosophy and provides a better understanding of how he grounds his notions of freedom equality and religious toleration convincingly argued and meticulously researched this book offers an exciting new direction for locke studies

## Conquering Evaluation Apprehension: A Practical Guide

Evaluation apprehension - the fear of being judged negatively - significantly impacts performance across various settings, from academic exams to job interviews and even everyday social interactions. This pervasive anxiety can hinder our ability to demonstrate our true capabilities and achieve our full potential. Understanding the evaluation apprehension model, its mechanisms, and strategies to mitigate its effects is crucial for improving performance and well-being. This article explores the model, addresses common challenges, and offers practical solutions to help you overcome this significant obstacle.

## Understanding the Evaluation Apprehension Model

The evaluation apprehension model posits that performance is influenced not only by the task itself but also by the individual's perception of being evaluated. This evaluation isn't solely about the outcome; it encompasses the entire process, including the perceived judgment of others on our abilities, effort, and character. The anxiety stems from the anticipation of negative judgment - a fear of failure, criticism, or social rejection. This anxiety then interferes with cognitive processes, leading to decreased performance and increased stress. The model's core components include: The Evaluator: This is the person or group perceived to be judging the individual. This could be a teacher, employer, supervisor,

peer, or even oneself. The Evaluation: This is the perceived judgment, which can be explicit (e.g., a formal test score) or implicit (e.g., unspoken expectations or nonverbal cues). The Apprehension: This is the anxiety and worry associated with the perceived evaluation, leading to physiological arousal and cognitive disruption. The strength of the apprehension depends on several factors: the perceived importance of the evaluation, the individual's self-esteem, the perceived competence of the evaluator, and the individual's past experiences with evaluation.

## Identifying and Managing Evaluation Apprehension

Recognizing the signs of evaluation apprehension is the first step towards managing it. Common symptoms include:

Physical symptoms: Increased heart rate, sweating, trembling, shortness of breath. Cognitive symptoms: Racing thoughts, difficulty concentrating, negative self-talk, self-doubt. Behavioral symptoms: Avoidance of challenging tasks, procrastination, poor performance. Once you identify these symptoms, you can implement strategies to manage the apprehension:

1. Preparation and Practice: Thorough preparation significantly reduces anxiety. For exams, this means studying diligently; for presentations, it means rehearsing thoroughly. The more prepared you are, the less you'll fear negative evaluation.
2. Self-Compassion and Positive Self-Talk: Replace negative self-talk ("I'm going to fail") with positive and realistic affirmations ("I've prepared well, and I'll do my best"). Practice self-compassion - treat yourself with the same kindness you'd offer a friend facing a similar challenge.
3. Reframing the Situation: Instead of focusing on the potential for negative judgment, reframe the situation as an opportunity for learning and growth. View the evaluation as feedback, not a reflection of your inherent worth.
4. Relaxation Techniques: Employ relaxation techniques like deep breathing,

meditation, or progressive muscle relaxation to manage physiological arousal associated with anxiety. 5. Visualization: Visualize yourself successfully completing the task, feeling confident and composed. This can help reduce anxiety and build confidence. 6. Seeking Support: Don't hesitate to seek support from friends, family, mentors, or professionals. Talking about your anxieties can help alleviate them.

## | Case Study: Overcoming Presentation Anxiety

Imagine Sarah, a student who experiences significant anxiety before presentations. She identifies her evaluator as her professor and peers, and the evaluation as their judgment of her presentation skills. Her apprehension manifests as racing thoughts, trembling hands, and difficulty speaking clearly. Using the strategies above, Sarah could:

1. Prepare rigorously: She thoroughly researches her topic, creates detailed notes, and rehearses multiple times.
2. Practice positive self-talk: Instead of thinking "I'll mess up," she repeats "I've prepared well, and I can do this."
3. Reframe the presentation: She views it as an opportunity to share her knowledge and receive valuable feedback.
4. Practice deep breathing: She uses deep breathing exercises before and during the presentation to manage her physiological symptoms.
5. Visualize success: She visualizes herself delivering a confident and engaging presentation.

By consistently employing these strategies, Sarah can significantly reduce her evaluation apprehension and improve her presentation performance.

## Conclusion

Evaluation apprehension is a common and significant barrier to optimal performance. However, by understanding the model's mechanisms and employing effective coping strategies, individuals can effectively manage their anxiety and achieve their full potential. Remember that preparation, self-compassion, and a positive mindset are key to overcoming this challenge.

## FAQs

1. Is evaluation apprehension always negative? While often detrimental, a certain level of evaluation apprehension can be motivating, pushing us to strive for excellence. The problem arises when it becomes excessive and debilitating. 2. How can I distinguish between healthy nervousness and excessive evaluation apprehension? Healthy nervousness is manageable and even energizing. Excessive apprehension significantly impairs performance and is accompanied by intense physical and psychological symptoms. 3. Can medication help with evaluation apprehension? In some cases, medication may be helpful, particularly for individuals with severe anxiety disorders. However, it's crucial to consult a healthcare professional. 4. Does evaluation apprehension only affect academic and professional settings? No, it can affect various aspects of life, including social interactions, relationships, and even creative pursuits. 5. What if my apprehension stems from a past negative experience with evaluation? Addressing past traumas or negative experiences through therapy or counseling can be vital in managing current evaluation apprehension. This often involves challenging negative beliefs and developing

healthier coping mechanisms.
