the search is on the world of kosmon needs a cure for a plague that leads ultimately to everyone s death the scientian race known for its rationality and understanding continues to fail in finding a cure while the transmutant race known for living by its emotions turns its hate toward the race of seers attempting to wipe them out amid the search for a cure seikh a young seerean boy is led on a journey to discover who he is and his purpose which is ultimately to find the cure the journey however is not without its troubles along the way he encounters those who want to deceive him and others who want to help him will seikh find the cure or will he be deceived by dark forces leaving the world of kosmon forever plagued with death

originally published in 1992 channeling is a comprehensive bibliography on the subject of channeling the book defines channeling as any message received or conveyed from transcendent entities and covers material on the history of channeling those that have claimed to transcend death contact with ufos and contemporary channeling groups the book acts as a research guide and seeks to outline the historical roots of channeling explaining its major teachings and considers its significance as a spiritual movement it provides sources from books booklets articles and ephemeral material and offers a comprehensive list of both primary and secondary materials related to channeling the bibliography takes the most diverse and useful sources of the time this volume although published almost 30 years ago still provides a unique and insightful collection for academics of religion in particular those researching spiritualism and the occult

not infallible is this book but to teach people to hear the creators voice and to see the heavens in full consciousness while still living on the earth and to know what awaits them after death oahspe in the late 1800s mystics from around the world brought forth enlightened perspectives and sacred texts that have set the path for our modern mystical traditions including the theosophical society the spiritualists movement rudolf steiner and anthroposophy christian science and the unity church to name a few oahspe was also written in the late 1800s and it shares many of the same perspectives eoihs voice in the wind illuminates the teachings of oahspe and the deeper meaning inherent in the original writings it teaches us how to develop our higher consciousness how to understand our interrelationship with the spiritual dimensions how to deepen our relationship to the creator and it explains the many phases of our journey into life after death eoins voice in the wind presents universal wisdom that transcends contemporary perspectives and it speaks of multidimensional realities co existing with life on earth through an interactive hierarchy of angelic beings

the concepts of the west are the allegories of the east and the truths of the elect behind the veil of terrestrial phenomena the occultist sees in the elemental forces of nature secondary causes which are in themselves the effects of primary causes produced and guided unerringly by divine intelligences the idea of anything in nature being inorganic or dead is materially fallacious and is utterly rejected by esoteric philosophy when matter appears inert it is the most active a stone block is motionless and impenetrable to all intents and purposes nevertheless its particles are in ceaseless eternal vibration which is so rapid that to the physical eye the stone seems devoid of motion substance is the pre cosmic substratum of matter undifferentiated yet interrelated with ideation supersensuous but atomic informed by the divine breath of its form substance does not mean matter in metaphysics it is boundless Æther formless and supernal the ultimate essence of matter in space and noumenon of evanescent matter on earth ether is physical and infernal kosmos is eternal noetic motion unmanifested the great breath of one element father Æther is the source and cause of all cosmic forces which are differentiated aspects of cosmic substance generated by substantial yet super sensuous powers

our cosmos is ruled by creative and intelligent occult forces they are emanations of conscious living entities acting behind the veil of matter the forces we know of are but the phenomenal manifestations of realities we know nothing about but which were known by the ancients the truths of today are the falsehoods of yesterday conceit and prejudice strangle every truth as only truth can dispel error truth should be the sole aim of science and justice it is true that pure force is nothing in the world of physics but it is the all in the domain of metaphysics inertia is the greatest of occult forces a flying cannon ball moves only from its own inherent force of inertia eternal vibration is the spiritual term for motion unmanifested unconscious innate noumenal it is the great breath of the one eternal element vortical motion is the material term for motion manifested conscious external phenomenal whatever may be the future name given to the force of inertia by scientists to maintain that that force does not reside in the atoms but only in the space between them is not true to the mind of an occultist it is like saying that water does not reside in the drops of which the ocean is composed but only in the space between those drops the atom belongs wholly to the domain of metaphysics it is an entified abstraction and has nought to do with physics strictly speaking as it can never be brought to the test of retort or balance avogadro's law holds the same place in chemistry as the law of gravitation does in astronomy occultists see in gravity only sympathy and antipathy or attraction and repulsion caused by physical polarity on our terrestrial plane and by spiritual causes beyond our illusive earth matter to the occultist and to those men of science who care too much for truth and too little for their vanity to dogmatise is that totality of existences in the kosmos which falls within any of the planes of possible perception if scientists could fathom the ultimate nature of these forces they would have first to admit their substantial nature however supersensuous science merely traces the sequence of phenomena on a plane of effects illusory projections from the region that occultism has long since penetrated light and heat sound and cohesion are the ghosts or shadows of matter in motion however there is no fundamental difference between light and heat each is merely a metamorphosis of the other heat is light in complete repose light is heat in rapid motion when light is combined with a body it becomes heat but when thrown off from that body heat reverts to light occult science may err in particulars but it can never become guilty of a mistake in questions of universal laws simply because divine science was born on higher planes and was brought on earth by beings who were far wiser than man will ever be occult science may be less well informed as to the behaviour of compound elements in various cases of physical correlations still it is immeasurably higher in its knowledge of the ultimate occult states of matter and of the true nature of matter than all the academies of science of our day may possess occult science does not regard either electricity or any of the forces supposedly generated by it as matter in any of the states known to physical science none of these forces so called are either solids gases or fluids an occultist would even object to electricity being called a fluid as it is an effect and not the cause but its noumenon he would say is a conscious cause the force which materialism considers as the cause of the diversity that surrounds us is in sober reality only an effect i.e. a result of that diversity in other words the cause of any force is not matter but motion itself and thus the great dogma no force without matter and no matter without force is dethroned and loses the solemn significance with which materialism has tried to invest it if nature abhors vacuum what is atom to admit the divisibility of the atom amounts to an admission of an infinite divisibility of substance which is equivalent to reducing substance to nothingness if the universe is composed of atoms then those atoms must be elastic absolutely non elastic atoms could never exhibit a single one of those numerous phenomena that are attributed to their correlations without any elasticity the atoms could not manifest their energy and the substance of the materialists would remain weeded of every force materialism is now enmeshed in a fatal circle of its own making if the blind inertia of physical science is replaced by the intelligent active powers behind the veil of illusive matter motion and inertia become subservient to those powers acceptance of the infinite

divisibility of the atom opens limitless horizons to substance informed by the divine breath of its soul in every possible state of tenuity states still undreamt of even by the most spiritually disposed chemists and physicists but alas the insanities of materialism and pessimism are incurable the most science can do is to assume the attitude of agnosticism but to do this requires a boundless love of truth and the surrender of the prestige of infallibility which the men of science have acquired among the flippant masses dualistic and anthropomorphic may be the philosophy of vishisht advaita when compared with the non duality of advaita it is yet supremely higher in logic and philosophy than the cosmogenesis exalted by christianity and science its great opponents

gravity is an obsolete law in starry heaven among the materialists gravity is the king of the all potent imponderables but among the students of the sacred science gravity is one of the attributes of differentiation manifested as the law of attraction and repulsion between various states of matter newton did not use the word attraction with regard to the mutual action of bodies in a physical sense to him attractions were impulses he believed that there is some subtle spirit by the force and action of which all movements of matter are determined for pythagoras forces were spiritual entities gods independent of planets and matter as we see and know them on earth who are the rulers of the sidereal heaven light heat electricity etc are affections not properties or qualities of matter matter is the prerequisite and vehicle for the manifestation of intelligent forces on this plane newton had derived his knowledge of gravitation and its laws from jacob böhme with whom gravitation or attraction is the first property of nature newton whose profound mind had fathomed the spiritual thought of the great seer in its mystic rendering owes his great discovery to böhme the nursling of the genii who watched over and guided him the voidness of the seeming full is the fullness of the seeming void it was from newton s theory of a universal void that dates the immense scorn now shown by the moderns for ancient physics though the old sages had always maintained that nature abhorred vacuum the mathematicians of the new world had discovered the antiquated fallacy and exposed it more recently modern science vindicated however ungracefully archaic knowledge having moreover to also vindicate newton s character and powers of observation at this late hour and now father Æther is welcomed once more with open arms and wedded to gravitation look back before moving forward must become the motto of exact science in finding herself itself inexact every leap year rough and up hill is the path of science her days are full of vanity and vexation of spirit the metaphysical tenets of

kepler are purely occult he was not the first to discover the theory of attraction and repulsion in kosmos for it was known from the days of empedocles the two opposite forces being called by him hate and love or repulsion and attraction kepler also gave a pretty fair description of cosmic magnetism why should he be denounced then as most unscientific for offering just the same solution as newton did only showing himself more sincere more consistent and even more logical where is the difference between newton s all powerful being and kepler s rectores his sidereal and cosmic forces or angels

karl barth s lectures on the first chapter of the gospel of john delivered at muenster in 1925 26 and at bonn in 1933 came at an important time in his life when he was turning his attention more fully to dogmatics theological interpretation was thus his primary concern especially the relation between revelation and the witness to revelation which helped to shape his formulation of the role of the written and spoken word vis a vis the incarnate word the text is divided into three sections john 1 1 18 19 34 35 51 with the largest share of the book devoted to the first section each section begins with barth s own translation followed by verse by verse and phrase by phrase commentary on the greek text although barth s interpretation is decidedly theological he does take up questions of philology and textual criticism more thoroughly than in his other works much has happened in johannine scholarship since these lectures were first delivered yet they remain valuable today 100 years after barth s birth both for their insights into the gospel and into karl barth

| 60k a Year is How Much an Hour? A Simple Breakdown

Earning a salary of \$60,000 a year sounds impressive, but how much does that translate to per hour? Understanding your hourly rate is crucial for budgeting, comparing job offers, and negotiating salary. This article will break down the calculation and offer practical insights to help you grasp the concept easily.

| 1. The Basic Calculation: Hours in a Year

The first step is determining the total number of working hours in a year. This isn't as straightforward as it seems, as it depends on several factors. **Standard Work Week:** A standard work week is typically 40 hours. **Number of Weeks:** Most people work 52 weeks a year. However, this includes vacation time, sick leave, and public holidays. To get a more realistic figure, we need to account for time off. Let's assume two weeks of vacation and one week of sick leave, leaving 49 working weeks. Therefore, the total number of working hours per year is approximately $40 \text{ hours/week} \times 49 \text{ weeks/year} = 1960 \text{ hours/year}$. This is a commonly used approximation, but the actual number might vary depending on your specific employment situation.

| 2. Calculating the Hourly Rate

Now that we have an approximate number of working hours, we can calculate the hourly rate: $\text{Annual Salary} / \text{Total Working Hours} = \text{Hourly Rate}$ $\$60,000 / 1960 \text{ hours} = \$30.61/\text{hour}$ (approximately) So, a \$60,000 annual salary translates to roughly \$30.61 per hour.

| 3. Factors Affecting the Actual Hourly Rate

The \$30.61 figure is an approximation. The actual hourly rate can vary depending on these factors: **Paid Time Off:** If your employer provides more than three weeks of paid time off, your actual hourly rate will be slightly lower. Conversely, fewer paid days off will result in a slightly higher hourly rate. **Overtime:** Many jobs offer overtime pay at a higher rate (e.g., time and a half). If you frequently work overtime, your effective hourly rate will be higher than the base calculation. **Bonuses**

and Commissions: Bonuses and commissions are not factored into the base hourly rate calculation. These additional earnings can significantly increase your overall compensation per hour, particularly in sales-oriented roles.

4. Practical Examples

Let's look at a few scenarios: Scenario 1: A teacher earns \$60,000 annually and has 10 weeks of paid time off. Their actual working hours would be lower, resulting in a higher hourly rate than \$30.61. Scenario 2: A software engineer earns \$60,000 annually plus a \$5,000 annual bonus. Their effective annual income is \$65,000, leading to a higher hourly rate. Scenario 3: A salesperson earns \$60,000 annually with significant commission potential. Their hourly rate can vary significantly based on their sales performance.

5. Key Takeaways and Actionable Insights

Understanding your hourly rate is vital for: Budgeting: Accurately estimating your monthly and weekly income. Job Comparisons: Assessing the value of different job offers, even if they have different salary structures. Negotiating Salary: Knowing your hourly rate empowers you to negotiate a fair salary. Freelancing/Consulting: Determining your hourly billing rate for freelance work. Remember that the \$30.61/hour figure is a simplified approximation. Always factor in paid time off, bonuses, commissions, and overtime to get a more accurate picture of your effective hourly rate.

Frequently Asked Questions (FAQs)

Q1: Does this calculation include taxes? A1: No, this calculation only considers your gross annual salary before taxes and other deductions. Your net (take-home) pay will be lower. Q2: How do I calculate my hourly rate if I'm paid bi-weekly? A2: First, calculate your annual salary by multiplying your bi-weekly pay by 26. Then, use the method described above to calculate your hourly rate. Q3: What if I work part-time? A3: Calculate your total annual earnings, and then divide by the number of hours you work per year to find your hourly rate. Q4: Should I consider benefits when calculating my hourly rate? A4: While not directly included in the hourly rate calculation, the value of benefits (health insurance, retirement contributions, etc.) should be considered when comparing job offers. Q5: Is it better to have a higher salary or a higher hourly rate? A5: It depends on your priorities. A higher salary might be preferable for job security and potential for advancement, while a higher hourly rate might be better for flexibility and earning potential in freelance/gig work. Consider your individual circumstances and career goals when

making this determination.
