dieses handbuch liefert einen Überblick über beschaffenheit und soziolinguistische
situation des deutschen am rande des geschlossenen deutschen sprachgebietes in
west und mitteleuropa dabei werden in einer zusammenschau sowohl
deutschsprachige minderheiten als auch mehrsprachigkeitskonstellation unter
beteiligung des deutschen in den blick genommen gemein ist allen szenarien dass sie
unmittelbar an ein gebiet mit deutschsprachiger mehrheitsbevölkerung grenzen

deutsch einen offiziellen status besitzt jedoch nicht unbedingt die volle funktionsbreite abdeckt in sieben gebietsartikeln wird jeweils ein Überblick über demographie geschichte sowie politische und rechtliche lage der minderheiten gegeben zusätzlich wird für jedes gebiet eine beschreibung der kompetenz und sprachgebrauchssituation wie auch der soziolinguistischen situation mit ihren je spezifischen standard substandard verteilungen geboten schließlich werden auch spracheinstellungen der sprecher und die visuell realisierte sprache im öffentlichen raum linguistic landscapes erläutert

das kontinuierlich ansteigende verkehrsaufkommen mit den daraus resultierenden umwelt auswirkungen stellt zukünftig ein wichtiges handlungsfeld dar insbesondere der immer mehr an bedeutung gewinnende motorisierte individualverkehr ist für einen steigenden kraftstoffverbrauch und steigende co2 emissionen verantwortlich die dänische stadt sonderborg verfolgt das ziel bis zum jahr 2029 co2 neutral zu werden bezüglich des verkehrssektors besteht eine hohe herausforderung in der senkung des miv da die kommune aus vielen ländlichen gebieten besteht aus diesen gründen ist das ziel dieses buches handlungsempfehlungen zu erarbeiten die für pendler der kommune sonderborg die attraktivität des öffentlichen busverkehrs steigern die nutzung des öffentlichen busverkehrs wurde mithilfe einer durchgeführten umfrage zum thema transportgewohnheiten auf dem täglichen arbeitsweg mit den drei größten arbeit^agebern der kommune ermittelt und analysiert die in diesem buch erarbeiteten handlungsempfehlungen sollen künftig dazu dienen dass weniger personen das auto auf dem weg zur arbeit nutzen und stattdessen auf den bus umsteigen durch diesen umstieg reduzieren sich auch die verkehrsbezogenen co2 emissionen hochgerechnet auf die gesamte kommune handelt es sich hierbei um eine mögliche reduktion von rund 66 5 tonnen co2 pro tag

in this book the author explains domain engineering and the underlying science and he then shows how we can derive requirements prescriptions for computing systems from domain descriptions a further motivation is to present domain descriptions requirements prescriptions and software design specifications as mathematical quantities the author's maxim is that before software can be designed we must understand its requirements and before requirements can be prescribed we must analyse and describe the domain for which the software is intended he does this by focusing on what it takes to analyse and describe domains by a domain we understand a rationally describable discrete dynamics segment of human activity of natural and man made artefacts examples include road rail and air transport container terminal ports manufacturing trade healthcare and urban planning the book addresses issues of seemingly large systems not small algorithms and it emphasizes descriptions as formal mathematical quantities this is the first thorough monograph treatment of the new software engineering phase of software development one that precedes requirements engineering it emphasizes a methodological approach by treating in depth analysis and description principles techniques and tools it does this by basing its domain modeling on fundamental philosophical principles a view that is new for a computer science monograph the book will be of value to computer scientists engaged with formal specifications of software the author reveals this as a field of interesting problems most chapters include pointers to further study and exercises drawn from practical engineering and science challenges the text is supported by a primer to the formal specification language rsl and extensive indexes

this book comprises an in depth and highly inclusive ethnographic study of daily life in two local danish probation offices with a special emphasis on manual based rehabilitative interventions the book explores the interactions between probation officers and citizens on probation serving conditional sentences or performing community service as well as the professionals rationales behind their rehabilitative efforts by presenting ethnographic findings that indicate a divergence between the envisioned trust based interactions and the reality of manual based scripted practices within the danish probation service the analyses reveal how rehabilitative interactions may seem choreographed with roles predetermined by an asymmetric social hierarchy this framework portrays the client as inherently obstinate unpredictable and cast as an irresponsible subject despite these challenges the book underscores probation officers genuine belief in the transformative power of motivational programs more precisely it assesses the potential for manual based or scripted rehabilitative interventions to genuinely inspire participatory citizenship among disenfranchised clients building on these empirically informed discussions the book ultimately endeavors to provide a positive and instructive conceptualization of the diverse activities in which probation officers acknowledging the limitations of their scripted interactions with clients appear to transgress their manual based mandate and perform professional disobedience given the broad applicability of the concept of professional disobedience extending beyond probation to other social service practices navigating the intersection of help

and control this book is intended for a wide array of researchers students practitioners and policymakers with an interest in punishment disenfranchisement and rehabilitation this book is essential reading for those engaged in probation criminal justice ethnography and nordic criminology

this book analyses the origins experiences and challenges of total defence in europe and comprises a broad spectrum of national case studies as well as one international organisation nato the topic of total defence has been brought to the fore by deglobalisation augmented international tension the us pivot to asia grey zone threats covid 19 and not least by the increased russian threat during the 2010s which culminated in the invasion of ukraine in 2022 the analysis here is based on an in depth analysis of the four major nordic countries the baltic countries poland ukraine

switzerland and the netherlands as well as a perspective from nato itself this volume argues that although the activity that we describe as total defence has many labels and various expressions which follow from each country s own history geopolitical setting and strategic culture some aspects of it are to be found in most countries this is because all countries at least to some extent will need their armed forces to rely on civil society in a crisis however it is a long way from this to a full fledged total defence concept with continued international tension the need to build resilient societies and the european need to take more responsibility for its own security in a cost efficient way this book argues that we should expect total defence to gain importance in the 21st century this book will be of much interest to students of security studies defence studies european politics and international relations in general

From the Halls of Montezuma to the Shores of Tripoli: Understanding the Marines' Iconic Motto

The United States Marine Corps' motto, "From the halls of Montezuma to the shores of Tripoli," is more than just a catchy phrase; it's a historical snapshot encapsulating two pivotal early battles that shaped the Corps' identity and legacy. While the phrase might seem cryptic at first glance, understanding its context reveals a powerful story of courage, resilience, and the enduring spirit of the Marines. This article breaks down the motto, exploring the historical events it represents and their lasting significance.

I. Montezuma's Halls: The Conquest of Mexico City (1847)

The "halls of Montezuma" refers to the capture of Mexico City during the Mexican-American War (1846-1848). Montezuma II was the last Aztec emperor, and his opulent palace in Tenochtitlan (present-day Mexico City) represented the heart of the Aztec Empire. The Marines, part of General Winfield Scott's invading army, played a crucial role in the siege and eventual capture of the city. The fighting was intense, involving street-to-street combat amidst the intricate canals and palaces of the Aztec capital. Imagine this: Imagine Marines navigating narrow, unfamiliar streets, facing fierce resistance from a determined enemy defending their homeland. This wasn't a straightforward battle on an open field; it was a complex urban warfare scenario that demanded adaptability, courage, and close-quarters combat skills. The Marines' success in this challenging environment solidified their reputation for fierce fighting ability in diverse and difficult terrains. The capture of the palace, a symbol of Aztec power, became a testament to their prowess.

II. The Shores of Tripoli: The First Barbary War (1805)

"The shores of Tripoli" refers to the Marines' participation in the First Barbary War (1801-1805). The Barbary pirates, operating from North Africa, were notorious for raiding ships and enslaving their crews. The United States, a young nation striving for international recognition, found itself targeted by these pirates. The Marines, under the command of Lieutenant Presley O'Bannon, played a vital role in a critical campaign against the city of Derna in present-day Libya. The battle of Derna was a significant test of the Marines' capabilities. They faced a formidable enemy in a foreign land, under harsh climatic conditions and with limited resources. Think of the logistical challenges: imagine transporting Marines across the ocean, supplying them with food and ammunition in a hostile environment, and engaging in combat against an enemy entrenched in a fortified city. The Marines' successful assault on Derna, culminating in the raising of the American flag over the city, was a major victory that significantly weakened the Barbary pirates and demonstrated American military might on a global stage.

III. The Significance of the Motto

The motto doesn't just commemorate two isolated battles; it encapsulates the core values of the Marine Corps: courage, determination, and adaptability. It signifies their willingness to fight anywhere, anytime, and under any condition. The diverse environments – the urban sprawl of Mexico City and the coastal desert of Tripoli – highlight the Marines' capacity to overcome diverse challenges and succeed in vastly different operational settings. The motto also embodies the legacy of service and sacrifice that defines the Marine Corps.

Key Takeaways and Actionable Insights

The Marine Corps motto is a powerful symbol of the Corps' history, courage, and adaptability. Understanding the historical context of the motto deepens appreciation for the Marines' contributions. The motto serves as a constant reminder of the Corps' commitment to duty and service.

FAQs

1. Why are these specific battles highlighted? These battles represent early instances where Marines showed exceptional courage and adaptability in challenging environments, establishing their reputation as elite fighting forces. 2. What other conflicts have Marines participated in? The Marine Corps has participated in numerous conflicts throughout American history, including World War I, World War II, Korea, Vietnam, and the numerous conflicts of the post-Cold War era. 3. What makes the Marine Corps unique? The Marine Corps is unique in its amphibious capabilities and its tradition of operating as an independent force within the larger Department of the Navy. 4. What are the core values of the Marine Corps? The core values are honor, courage, and commitment. 5. How can I learn more about the Marine Corps' history? You can visit the National Museum of the Marine Corps in Quantico, Virginia, explore online resources from the Marine Corps Historical Center, or read books and documentaries about the Marine Corps' involvement in various conflicts.
