this book examines the role of foreign languages and cultures in the Algerian educational system highlighting how cultural imperialism and supremacy persist through

damaging language ideologies and the privileging of colonial languages such as french and english the authors challenge the claim that the algerian educational system can be considered neutral arguing instead that it was and still is the outcome of a conflict between arabised and francophone elites serving strategic and ideological objectives rather than cultural or pedagogical goals this book will be relevant to students and scholars of language education language policy and planning and the history and politics of the arab and muslim world especially those interested in the influence of western languages and cultures and the democratisation of educational systems

borowiec surveys north african history and current efforts to halt the movement of the sahara into surrounding countries he shows how efforts in tunisia are making headway against this ecological disaster which confronts not only north africa but southern europe and possibly the world in general veteran north african observer andrew borowiec surveys the history of the countries surrounding the sahara showing that tunisia is the only country actively resisting the encroachment using onsite visits interviews and an examination of government records and newspaper accounts he examines how tunisians are pursuing a bold approach to the problem he shows how tunisia a small poor but ambitious country is taming the world s largest desert by erecting barriers against sandstorms controlling urbanization experimenting with farming settling nomads and successfully exploiting the desert as a major tourist attraction their efforts illustrate that there are ways to fight a major ecological disaster that demands serious attention across the globe to many sahara is a magic word a sea of sand the desert has always fascinated explorers geographers environmentalists and novelists who turned to it for inspiration and adventure yet the sahara poses an increasing challenge to humanity lakes that once dotted parts of the desert are drying up such as lake chad the continent s fourth largest lake which has shrunk by 92 percent as oases

and grazing areas are abandoned the region's population loses its livelihood and chances for survival resulting in social and political upheaval the sahara's encroachment is a disaster for large portions of africa but it is also affecting europe and perhaps the world in general windblown saharan sand reaches rome athens spain france and turkey and the resultant climatic and agricultural changes are only beginning to be studied and feared

since september 11 2001 and the wars in afghanistan and iraq many television viewers in the united states have become familiar with al jazeera as offering an alternative take on events from that presented by mainstream u s media as well as disseminating anti american invective westerners have tended toward simplistic views of arab newspapers radio and television assuming that they are all under government control and that freedom of press is non existent william a rough a long time observer of the arab mass media offers a more nuanced picture of the arab press as it relates to the political situation in the arab world today although governmental influence over the media is

stronger in the middle east than in europe or the united states rugh argues that there is more diversity in the arab media than most people in the west realize in reality the arab media are coming to reflect the diversity and wide range of opinions of those within the arab world itself in particular the advent of privately owned arab satellite television in the 1990s has led to significant liberalization of the media throughout the region rugh concludes that a democracy of ideas and voices is slowly growing in the arab world and he remains guardedly optimistic about the positive role the arab media can play in processes of democratization and nation building

the works collected in the lure of authoritarianism consider the normative appeal of authoritarianism in light of the 2011 popular uprisings in the middle east despite what seemed to be a popular revolution in favor of more democratic politics there has instead been a slide back toward authoritarian regimes that merely gesture toward notions of democracy in the chaos that followed the arab spring societies were lured by the prospect of strong leaders with firm guiding hands the shift toward normalizing these regimes seems sudden but the works collected in this volume document a gradual shift toward support for authoritarianism over democracy that stretches back decades in north africa contributors consider the ideological socioeconomic and security based justifications of authoritarianism as well as the surprising and vigorous reestablishment of authoritarianism in these regions with careful attention to local variations and differences in political strategies the volume provides a nuanced and sweeping consideration of the changes in the middle east in the past and what they mean for the future

how do centralized institutional religions make peace with the modern state s displacement of their traditional prestige and power what are the factors that can

promote the mutual acceptance of religious communities and the secular rule of law these are the questions posed in jonathan laurence s new book which argues that roman catholicism and sunni islam have trod surprisingly similar paths in their respective histories contemporary roman catholicism and sunni islam both descend from religious states and empires the papacy in the case of catholicism and the caliphate in the case of islam as religio political orders the western church and the islamic caliphate ruled vast territories and populations each set of religio political institutions made law controlled land and governed people for roughly four centuries yet both suffered three similar upheavals and challenges the end of empires the rise of the modern national state and significant outward migrations from the home base of the religious tradition laurence suggests that the historical experience of catholicism offers a useful model for those concerned about the contemporary sunni muslim leadership s attitude toward the modern state just as catholicism worldwide benefited from the survival of the vatican micro state and its ability to exert guidance over the religious belief and practice of catholics worldwide so argues laurence muslim majority states should continue exert control over mosques imam training and religious education to reconcile islam with the rule of law and thus with the authority of the secular state this book is based on prodigious archival research in vatican and ottoman archives and on interviews conducted with senior officials responsible for islamic affairs or public religious education in algiers ankara casablanca istanbul oran rabat tunis and with senior interior ministry and foreign ministry officials in various european capitals responsible for relations with north african turkish qatari and saudi ministries of islamic and religious affairs

per erik nilsson takes a religious studies approach to analyse the intersections of secularism nationhood and populism in contemporary france this book provides insight into the french and european radical nationalist ideology and activism and contributes to our understanding of the complex relationship between religion and the state in contemporary europe and beyond when marine le pen became the leader of the radical nationalist and populist party national front in 2011 she made clear that secularism was a core value of party this signalled a significant shift in the party s rhetorical strategies and previous reluctance to embrace secularism nilsson argues that this conspicuous appropriation first came about as a logical result of the obsession of the established mainstream political parties and news media with questions of secularism national identity and islam he shows that a key player in understanding the national front s change is the web based journal riposte laïque which has become a central actor in french radical nationalist and anti muslim web and street based activism for the first time this source is examined in order to understand french radical nationalists recent appropriation of secularism as well as debates on secularism national identity and islam in france more broadly

the covid 19 pandemic was global in its spread and reach as well as in its medical social and economic effects in many respects the global effort to flatten the curve produced a flattening of experience around the world and a striking coincidence of similar experiences in countries the world over the identity simultaneity and uniformity of experience were also manifest in common concerns at the intersection of law and religion in many nations around the world including africa the lockdowns and closure of religious worship centres churches mosques and religious organisations of all sorts

raised questions of freedom of religion and the related concern for freedom of assembly along with concerns about the relation of religion to science and public health religious channels of communication and religious provision of social services after all health communications and social services are all areas in which african religious organisations play key roles potential tensions around these issues raised further considerations about the nature of religion state relations the status of religious authority and whether religious and state actors would work together or at odds in addressing the covid 19 pandemic

The Sneaky Double-Whammy: Unveiling the Ad Hominem Straw Man Fallacy

Imagine a debate where, instead of addressing the actual arguments, one opponent starts attacking the other's character while simultaneously twisting their position into a ridiculously weak caricature. This, my friends, is the captivating, frustrating, and sadly common world of the "ad hominem straw man" fallacy. It's a double-barreled logical blunder that cleverly combines two distinct fallacies to undermine its target, leaving the audience confused and potentially swayed by deceptive tactics. This article will dissect this sneaky rhetorical weapon, providing you with the tools to identify and counter it effectively.

1. Understanding the Two Components: Ad Hominem and Straw Man

Let's first understand the individual components of this logical "Frankenstein's monster."

Ad Hominem: This Latin phrase translates to "to the person." An ad hominem fallacy occurs when someone attacks the person making the argument rather than the argument itself. Instead of addressing the merits of a claim, the focus shifts to irrelevant aspects of the arguer's character, background, or motives. For example, dismissing a climate scientist's research because they drive a gas-guzzling car is an ad hominem

fallacy. The scientist's personal choices are unrelated to the validity of their scientific findings. Straw Man: This fallacy involves misrepresenting someone's argument to make it easier to attack. The opponent creates a distorted, simplified, or exaggerated version of the original argument—a "straw man"—and then proceeds to demolish this weak imitation. The real argument remains unscathed, but the audience may mistakenly believe it has been refuted. For example, someone advocating for stricter gun control might be accused of wanting to take away everyone's guns, a far more extreme position than the original argument.

2. The Ad Hominem Straw Man: A Deceptive Combination

The ad hominem straw man fallacy cleverly combines these two fallacies. It involves both attacking the person making the argument and distorting their argument into a weaker, more easily refutable version. This creates a powerful, albeit dishonest, rhetorical effect. The attacker achieves a double blow: discrediting the person and seemingly defeating their argument. Example: Let's say Sarah argues for increased funding for public libraries. An opponent might respond: "Sarah, who clearly hasn't read a book in years, thinks we should waste taxpayer money on dusty old libraries! She clearly just wants a free place to hang out, not to support education." This response employs both ad hominem and straw man tactics. It attacks Sarah's character ("clearly hasn't read a book in years") and distorts her argument (implying she wants a hangout space instead of supporting education). The actual argument for increased library funding—potentially emphasizing its role in community education, digital literacy, or

equal access to information—is completely ignored.

3. Recognizing and Countering the Ad Hominem Straw Man

Spotting this fallacy requires careful attention to the details of the argument. Ask yourself: Is the critic focusing on the person or the argument? If the focus shifts to personal attacks, alarm bells should ring. Is the argument being accurately represented? Compare the critic's portrayal of the argument with the original statement. Are there exaggerations, simplifications, or outright misrepresentations? Is the criticism relevant to the argument's merit? If the attack is irrelevant to the argument's validity, it's likely an ad hominem fallacy. To counter an ad hominem straw man, you need a two-pronged approach: 1. Expose the Straw Man: Clearly point out the misrepresentation of the original argument. Show how the critic has distorted, simplified, or exaggerated your position. 2. Address the Ad Hominem Attack: Acknowledge the personal attack but refuse to engage with it directly. Redirect the conversation back to the merits of the argument, stating, for example, "My personal habits are irrelevant to the validity of my argument about public library funding."

4. Real-Life Applications: Politics, Social Media, and Everyday Discussions

The ad hominem straw man is a pervasive fallacy frequently found in heated political

debates, online discussions, and even casual conversations. Politicians often resort to this tactic to discredit their opponents, while social media provides a breeding ground for such manipulative rhetoric. Understanding this fallacy is crucial to navigating the often-toxic landscape of online discourse and engaging in constructive dialogue.

5. Reflective Summary

The ad hominem straw man fallacy is a potent rhetorical weapon that undermines rational discourse by combining personal attacks with argument distortion. Recognizing this tactic requires a careful analysis of the argument, paying close attention to whether the criticism focuses on the person or the argument, and whether the argument is accurately represented. By understanding the mechanics of this fallacy and practicing effective counter-strategies, we can better engage in productive discussions and resist the allure of manipulative rhetoric.

FAQs

1. Is it always easy to identify an ad hominem straw man? No, it can be subtle and cleverly disguised. Practice and critical thinking skills are essential for detection. 2. Can I use an ad hominem argument if my opponent is being dishonest? While understandable, resorting to ad hominem attacks weakens your position and hinders productive discussion. Focus on refuting the argument itself. 3. What if the opponent genuinely misunderstands my argument? Clarify your position patiently and respectfully. Offer further explanations or examples to address any misunderstandings. 4. Is it okay to point out hypocrisy in an opponent's argument? Pointing out hypocrisy is different

from launching a full-blown ad hominem attack. The key difference lies in focusing on the contradiction within the argument itself, not on the person's character. 5. How can I improve my ability to detect and counter fallacies? Practice critical thinking, analyze arguments carefully, learn about different types of fallacies, and engage in discussions with diverse viewpoints.
