an essential guide to transforming the quotidian communications that feed inequality in our schools from the award winning editor of everyday antiracism words matter every day in schools language is used whether in the classroom in a student teacher meeting or by principals guidance counselors or other school professionals implying intentionally or not that some subset of students have little potential as a result countless students underachieve others become disengaged and ultimately we all lose mica

pollock editor of everyday antiracism the progressive teacher s must have resource now turns to what it takes for those working in schools to match their speech to their values giving all students an equal opportunity to thrive by juxtaposing common scenarios with useful exercises concrete actions and resources schooltalk describes how the devil is in the oft dismissed details the tossed off remark to a student or parent about the community in which she lives the way groups based on race ability and income are discussed in faculty meetings about test scores and data the assumptions and communication breakdowns between counselors teachers and other staff that cause kids to fall needlessly through the cracks or the deflating comment to a young person about her college or career prospects schooltalk will empower educators of every ilk revealing to them an incredibly effective tool at their disposal to support the success of all students every day their words

fueled largely by significant increases in the latino population the racial ethnic and linguistic texture of the united states is changing rapidly nowhere is this latinisation of america more evident than in schools the dramatic population growth among latinos in the united states has not been accompanied by gains in academic achievement estimates suggest that approximately half of latino students fail to complete high school and few enroll in and complete college the latinization of u s schools centres on the voices of latino youth it examines how the students themselves make meaning of the policies and practices within schools the student voices expose an inequitable opportunity structure that results in depressed academic performance for many latino youth each chapter concludes with empirically based recommendations for educators seeking to improve their practice with latino youth stemming from a multiyear participatory action research project conducted by irizarry and the student contributors to the text

since the end of legal segregation in schools most research on educational inequality has focused on economic and other structural obstacles to the academic achievement of disadvantaged groups but in contesting stereotypes and creating identities a distinguished group of psychologists and social scientists argue that stereotypes about the academic potential of some minority groups remain a significant barrier to their achievement this groundbreaking volume examines how low institutional and cultural expectations of minorities hinder their academic success how these stereotypes are perpetuated and the ways that minority students attempt to empower themselves by redefining their identities the contributors to contesting stereotypes and creating identities explore issues of ethnic identity and educational inequality from a broad range of disciplinary perspectives drawing on historical analyses social psychological experiments interviews and observation meagan patterson and rebecca bigler show that when teachers label or segregate students according to social categories even in subtle ways students are more likely to rank and stereotype one another so educators must

pay attention to the implicit or unintentional ways that they emphasize group differences many of the contributors contest john ogbu's theory that african americans have developed an oppositional culture that devalues academic effort as a form of acting white daphna Oyserman and daniel Brickman in their study of black and latino youth find evidence that strong identification with their ethnic group is actually associated with higher academic motivation among minority youth yet as julie garcia and jennifer crocker find in a study of african american female college students the desire to disprove negative stereotypes about race and gender can lead to anxiety low self esteem and excessive self defeating levels of effort which impede learning and academic success the authors call for educational institutions to diffuse these threats to minority students identities by emphasizing that intelligence is a malleable rather than a fixed trait contesting stereotypes and creating identities reveals the many hidden ways that educational opportunities are denied to some social groups at the same time this probing and wide ranging anthology provides a fresh perspective on the creative ways that these groups challenge stereotypes and attempt to participate fully in the educational system

Decoding the Enigma: Mastering the Challenges of Egyptian Senet

Senet, an ancient Egyptian board game dating back to the First Dynasty (c. 3100 BCE), is more than just a pastime; it's a window into the beliefs, social structures, and mathematical understanding of a sophisticated civilization. Its enduring appeal lies not only in its elegant simplicity but also in the strategic depth concealed within its seemingly straightforward rules. However, mastering Senet presents several challenges, particularly for modern players unfamiliar with its unique mechanics and nuances. This article aims to address common questions and difficulties encountered when learning and playing Senet, offering solutions and insights to help you unlock the secrets of this captivating game.

Understanding the Game Board and Pieces

The Senet board consists of 30 squares arranged in three rows of ten. These squares aren't simply numbered; their arrangement is significant, mirroring the journey of the soul through the afterlife according to ancient Egyptian beliefs. The squares themselves often featured symbolic representations reinforcing this spiritual context. The game uses seven pieces per player, typically represented by small cones or similar objects. Each player aims to move their pieces from their starting zone (the first three squares) to the end zone (the last three squares). Understanding the significance of each square is crucial; some squares represent "houses" offering protection, others act as "traps," and still others advance or delay players based on the roll of the sticks.

Mastering the Stick-Throwing Mechanism

The core mechanic of Senet involves throwing four sticks, typically short, slender pieces of wood. The sticks can land with one of three faces up – either blank or marked. The number of marked faces determines the move: One marked face: Move one space. Two marked faces: Move two spaces. Three marked faces: Move three

spaces. Four marked faces: Move four spaces. Zero marked faces: This represents the "Nil" move, often misinterpreted. It doesn't mean no movement; rather, it necessitates a specific action, often outlined by house rules. Traditionally, a nil roll might allow for moving a piece from a certain square, or selecting a piece to move, or offering advantages to the opponent. Example: If a player throws three marked faces, they move one of their pieces three spaces forward.

Navigating Special Squares: Houses and Traps

Several squares on the Senet board have special functions: Houses (squares 26-28): These squares provide protection against capture and can be considered "safe havens." A piece in a house cannot be moved or captured. Traps (squares 13 & 22): A piece landing on a trap is usually moved back to its starting area or returned to its own house or area. Rules surrounding the location vary by historical context and game interpretations. Birth Squares (1-3): Starting points for your pieces. Final Squares (28-30): The winning zone. Once all a player's pieces reach these squares, they win the game.

Strategic Gameplay: Blocking, Capturing, and Planning

Senet is not just about luck; it involves considerable strategy. Players must anticipate their opponent's moves, block their paths, and exploit opportunities created by the special squares. Capturing an opponent's piece is usually achieved by landing on the same square, forcing the captured piece back to its starting area. Example: A strategic play might involve blocking the opponent's path by placing a piece strategically on the route to the end zone. Simultaneously, players can aim to get their own pieces safely to the final squares.

The Role of the "Nil" Throw (Zero Marked Faces): A Deeper Look

The handling of the "Nil" throw is a key point of variation in Senet gameplay. Historical evidence suggests different interpretations throughout Senet's history. Some versions allowed players to select a particular piece to move, while others prescribed a specific movement or strategic advantage, making it a crucial element of game dynamics. Modern interpretations often focus on creating variability and avoiding a standstill; a rule might be included to allow a movement to a pre-specified square, a jump over an opponent's piece, or an exchange of positions.

Conclusion

Mastering Senet requires understanding its unique mechanics, including the stick-throwing, special squares, and the significance of each action. Strategic thinking, anticipation, and calculated risk-taking are equally important for success. While the game's rules might seem simple at first glance, it's the interplay of chance and strategy that creates its enduring appeal, offering endless possibilities for enjoyment and intellectual stimulation. The game stands as a testament to the ingenuity and depth of thought within ancient Egyptian society.

FAQs

1. What are the winning conditions in Senet? A player wins when all seven of their pieces reach the final three squares (28-30). 2. Can I move more than one piece per turn? Generally, you can only move one piece per turn. However, some variations and house rules might allow for moving multiple pieces under certain circumstances, particularly in relation to a "Nil" throw. 3. How are disputes resolved? There's no standardized rule book for historical Senet. Disputes should be settled by referring to agreed-upon house rules before the game starts. 4. Where can I find a Senet board and pieces? Senet boards and pieces are widely available online and at many historical

artifact and game stores. Many variations of materials are acceptable. 5. What are the historical interpretations of the different squares on the board? Scholars have proposed interpretations that link the arrangement of the squares to the Egyptian underworld and the journey of the soul. These interpretations vary, and further research is ongoing. Each square's meaning can be a matter of personal research and interpretation.
